# BIGHORN AI KIT™

Booz Allen's Bighorn Artificial Intelligence (AI) Kit™ delivers advantage in building and sustaining practical AI solutions in disconnected environments. Work with us to tailor the product and improve your use of AI at the edge.

TODAY'S AI IS FRAGILE: AI models brought from the lab and put into the operational space are not built to deal with change. A change to the mission target or operational environment can make things much harder for AI or even fool it completely.

TODAY'S AI DOESN'T ADAPT FAST ENOUGH: In today's modern and evolving operations, many capabilities rely on machine learning (ML)/AI to perform mission functions, such as terrain mapping and object detection/classification. In an environment that can change quickly (e.g., disaster response, wartime battlefield), the ability to perform rapid updates to those ML/AI capabilities is critical to mission success. Today, ML/AI model updates can take months. Bighorn enables model refinements in minutes, even during an ongoing mission.

Our Bighorn AI Kit™ brings a semi-automated workflow for a non-expert to build AI models and deploy to edge devices in minutes.

FEATURES

+ **FAST/USER-FRIENDLY AI BUILDING:** Both technical and non-technical users can easily create or update AI by navigating through a set of images and flagging the images of interest. Synthetaic RAIC™ auto-labeling and rapid training expands the dataset and builds AI in minutes instead of hours.

+ **OPTIMIZE, DEPLOY, AND TRACK AI ON MULTIPLE DEVICES:** With partner LatentAI™ Technology Inside: Bighorn AI Kit creates optimized AI to fit each device type for improved deployment, run speed, and power usage.

+ **RUGGEDIZED FORM FACTOR:** Bighorn AI Kit is ruggedized for military toughness and packs graphics processing unit (GPU)-enabled compute and massive storage—all in the size of a carry-on suitcase.

About Booz Allen

For more than 100 years, military, government, and business leaders have turned to Booz Allen Hamilton to solve their most complex problems. As a consulting firm with experts in analytics, digital solutions, engineering, and cyber, we help organizations transform.

With global headquarters in McLean, Virginia, our firm employs approximately 31,100 people globally as of December 31, 2022, and had revenue of $8.4 billion for the 12 months ending on March 31, 2022. To learn more, visit **BoozAllen.com**. (NYSE: BAH)
